# Question

How quickly does sentiment towards political operatives change, relative to their place in the social hierarchy?

As a Washington insider falls from grace, how quickly do those active in the #MAGA and @realDonaldTrump shift allegiance?

Did sentiment change towards Bannon before and after he was fired by Trump?  
How does sentiment differ between @realDonaldTrump and #MAGA?

How does sentiment towards Comey change leading up to his book release?

# Techniques

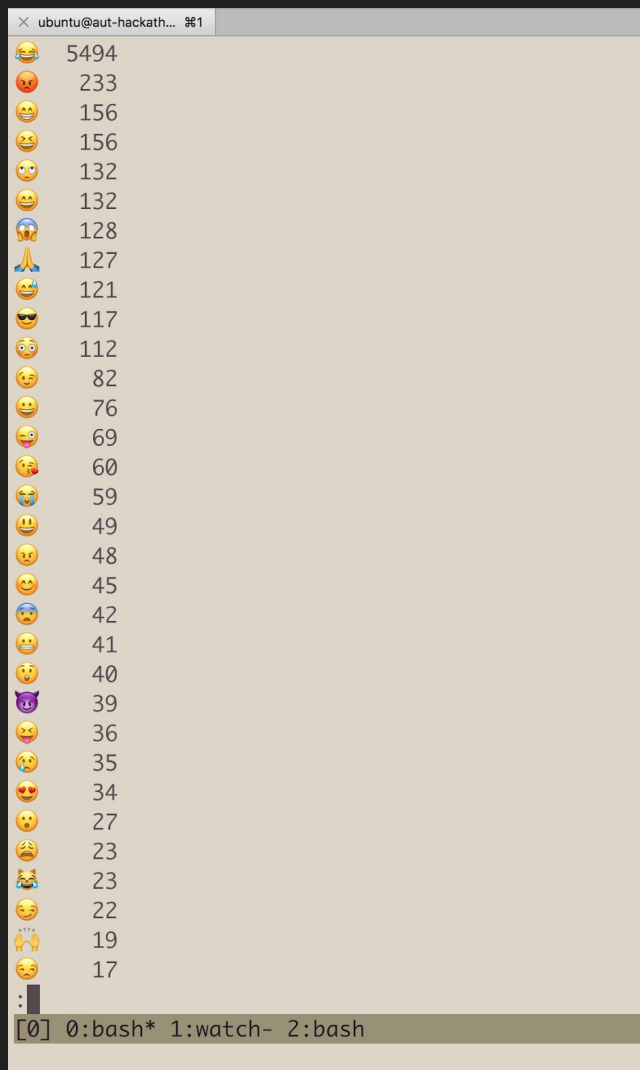

We use sentiment as a proxy for shifting allegiance.

We implement two methods of measuring sentiment:

- Mapping of Emojis to sentiment scores (*Novak, 2015*)
- Text-based sentiment analysis with the Python TextBlob library

# Extremely preliminary results

Emojis that appear in Tweets  
sent to @realDonaldTrump  
that contain the word  
'Bannon'

A screenshot of a terminal window titled 'ubuntu@aut-hackath...' with a tab labeled '#1'. The terminal displays a list of 35 emojis, each followed by a count. The counts are arranged in descending order. The emojis include various expressions of emotion, such as happiness, sadness, anger, and surprise, as well as some more specific icons like a praying hands emoji and a cat face emoji. The terminal prompt is '[0] 0: bash\* 1: watch- 2: bash'.

[0] 0: bash\* 1: watch- 2: bash

# Steps

For @realDonaldTrump:

1. Using twarc as a library, Find all tweets containing the word 'bannon' (case insensitive) in the tweet text
2. In tweets containing 'bannon' find & print all emojis & count
3. In tweets containing 'bannon' find & print timestamp, identifier, Twitter handle, tweet content
4. Repeat for 'Comey'

For #MAGA: Do the same just for 'bannon'

Steve Bannon fired by Trump

# Textblob sentiment analysis - 'Bannon' in @realDonaldTrump emoji tweets

• positive  
• neutral  
• negative

**How are we  
feeling about  
Steve Bannon?**

# Emoji sentiment analysis - 'Comey' in @RealDonaldTrump emoji tweets

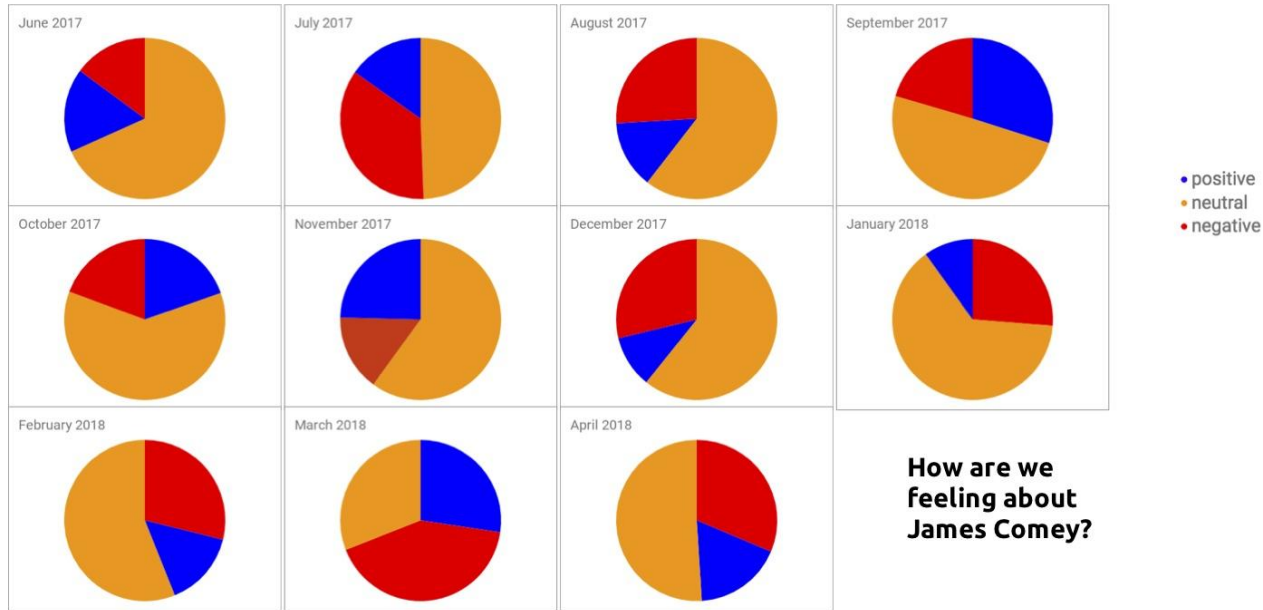

# Textblob sentiment analysis - 'Comey' in @RealDonaldTrump emoji tweets

# Comey All @realDonaldTrump Tweets - Mean Sentiment from Textblob

# Comey and Emoji - Sentiment from Textblob Rating

# Caveats & Limitations

- We don't know the source of these sentiments (are they mad *at* DJT, or *with* him?)
- How people use emojis has changed very rapidly (emoji study was done in 2015)
- There are more positive emojis than negative emojis available
